Acubiz starts cooperation with AirPlus International on the handling of AirPlus Company Account data

Birkeroed (Denmark), 27 March 2008 – Acubiz A/S, one of Europe's leading suppliers of web based expense management systems, starts cooperation with the global and award winning AirPlus International on the handling of AirPlus Company Account data.

The cooperation meets specific customer demands and, at the same time, expands the number of data suppliers to Acubiz EMS in Denmark and abroad. Initially the data from AirPlus Company Account (business travel purchase) will be handled, but the possibility of implementing AirPlus Corporate Card will be a natural follow-up based on geographical market relevance. The combination of AirPlus Company Account and Acubiz EMS gives corporations more options when it comes to optimizing and automating expense management processes as well as consolidating international purchase data.

###

About Acubiz A/S:

In just 10 years Acubiz A/S has developed into one of Europe's leading suppliers of web based expense management systems. Acubiz EMS (Expense Management System) is now used by more than 25.000 corporate users in 8 countries. Acubiz EMS and CEM are developed with focus on simplifying daily routines for all employees – and thus provide companies with significant savings through automation of manual processes.

About AirPlus International:

AirPlus International is a global leader for business travel payment solutions. With AirPlus central payment accounts the customers payment routines are optimized and they gain greater control over their travel spending. More than 32,000 companies have come to trust AirPlus.
