

## PRESS RELEASE

### **Now Vejle Rejser's customers can manage their expenses in minutes.**

---

**Vejle Rejser wants to help their customers organise travels from start to finish. Therefore, the travel agency contracted with Acubiz regarding distribution of Acubiz EMS (Expense Management System)**

**Birkerød, 7 July 2008** – Expense management is one of the most boring and time-consuming tasks for most business travellers. But now Vejle Rejser ApS, one of Denmark's leading travel management companies, makes it lightning fast to settle the expenses. This is possible due to a new partner agreement with Acubiz A/S, one of Europe's leading suppliers of web based expense management systems.

"Vejle Rejser believes it is a natural part of the cooperation with our customers to focus on every part of the supply chain – from planning and ordering the trip until it has been settled", says Ole Svendsen, CEO Vejle Rejser, and continues: "It is our experience that it is a great help if the expense settlement is automated by means of EMS. This is why we have chosen to implement and distribute the system for the benefit of our customers. Acubiz has great experience, professional products and willingness to meet specific customer needs, which are the main reasons why they were our natural choice as a partner."

Acubiz is also very pleased with the new cooperation agreement:

"In recent years we have seen an increased interest in automating the expense management area – and look forward to the cooperation with Vejle Rejser. They are one of Denmark's leading travel management companies and in daily contact with our primary target group. We are therefore convinced that the message of great savings through automation of the expense reconciliation process now will reach even more Danish companies", says Henrik Boysen, Acubiz' International Sales Director.

Acubiz EMS (Expense Management System) is developed with a focus on simplifying daily routines for all employees – and thus provide companies with a significant saving through automation of manual processes.

#### About Acubiz A/S:

In just 10 years Acubiz A/S has become one of Europe's leading suppliers of web based expense management systems. Today Acubiz EMS (Expense Management System) is used by more than 26,000 corporate users in 13 countries. Acubiz EMS and CEM (Crew Expense Management) are developed with a focus on simplifying daily routines for all employees – and thus provide companies with significant savings through automation of manual processes.

#### About Vejle Rejser ApS:

Vejle Rejser ApS was established in 1969, and today it is Denmark's largest privately owned travel management company. It has always been Vejle Rejser's objective to give the customer personal and professional advice that creates value in the cooperation. In September 2007 Vejle Rejser was elected "Denmark's best travel management company" by the Danish Travel Awards.
