

ACUBIZ EMS

Web-based and digital Expense Management

Acubiz EMS is an intuitive, flexible and web-based expense management service that streamlines the processes within expense reporting. It helps your company reduce transaction costs and boost efficiency and productivity.

The service handles all expenses related to the employees including credit card transactions, enclosures, allowances, travel expenses, mileage, car leasing, phone and VAT.

With an automatised workflow all e-transactions and cash expenses related to the employees are easily managed, and with a few clicks the expense report is created, accepted and booked. A user-friendly user interface designed like net banking makes the service easily accessible to users at all levels. Acubiz EMS is compatible with all payroll and ERP systems.
