

TIME

Time and absence registration on the go with Acubiz One

The **Acubiz Time** feature in Acubiz One facilitates time recording. With just a few clicks you can enter working hours, illness, holiday and other kinds of absence. All of which are instantly uploaded to your Acubiz EMS profile.

The categories can be adapted easily to your requirements for reporting employee time. You may for instance need to be able to register hours on certain customer projects or to have certain categories for sick leave. Time is the obvious choice for companies who need their hourly paid employees, temps and student assistants to track their time
