

## MILEAGE

# Accurate Mileage registration with Acubiz One

**Mileage** is a feature in Acubiz One for electronic registration of mileage. Your mileage registration is uploaded directly to your Acubiz EMS - in accordance with local legislation!

When you activate the app on your smartphone it automatically registers your starting point and - at the end of your trip - your destination. Mileage calculates the locally valid reimbursement rates and provides an accurate overview of all your mileages. You can also enter your trip manually. Acubiz Mileage is integrated with Google Maps and will suggest the fastest trip among all the suggestions.

Smooth integration with any payroll system further facilitates mileage reimbursement for both employees and the finance department
