

Acubiz Time

The complete time registration solution

Acubiz Time is a digital tool for managing time consumption within a company – and thereby optimizing the use of resources.

Acubiz Time is built around two modules: **Basic** and **Advanced**. The Basic module is giving access to basic personnel administrative absence- and hour registrations such as holiday and sickness. The Advance module allows a more detailed registration of hours linked to projects, cases, customers, departments etc.

Acubiz Time Basic

The Acubiz Time Basic module offer all types of businesses a digital solution for managing basic absence- and hour registrations. Every registration is made digitally which ensures overview, insight and easy reporting. From the admin interface it is easy to export data that can be loaded into the salary system.

Acubiz Time Advanced

With Acubiz Time Advanced your company benefits from all of the Basic module's features as well as a more detailed registration of hours that can be linked to projects, cases, customers, clients, departments etc. The module is based on a "Weekly Report" structure. The users must enter their basis time and the use of the weekly report can then begin.

This makes it easy to get an overview of the time consumption across the above parameters and thus create an accurate basis for invoicing. Advanced is the perfect solution for companies working on project or case basis.

Benefits across the organization

Employee

- Time-saving, intuitive and digital
- Overview of hours and absence
- No more spreadsheets or charts

Finance and HR

- Integration to any salary system
- Ongoing overview, insights and statistics
- Create data for re-invoicing

Management

- 100 % overview and documentation
- Resource management
- Transparency

Acubiz Time can be bought individually or combined with Acubiz' other solutions for managing expenses, mileage or invoices. If combined, it's possible to create a complete overview of the company's total costs related to individual projects, cases, customers etc.
